

Dynamic Treatment Regimes with Measurement Error

A Non-Technical Overview (where we mostly talk about video games!)

The Setup of Our Game

 x5 SCORE 31415

Question at Hand

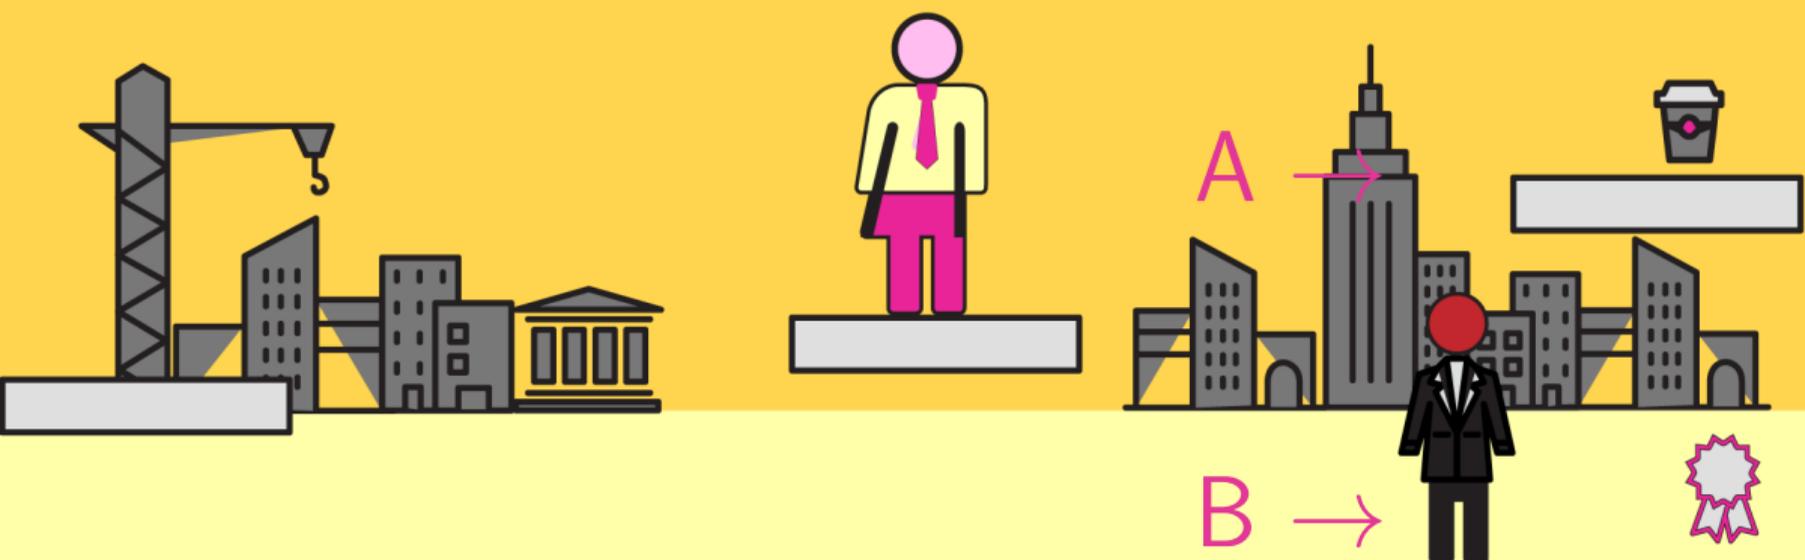

Given our *current stats and position*, what *action* should we take?

The Setup of Our Game

 x5 SCORE 31415

Start at the End!

 x2 SCORE 62831

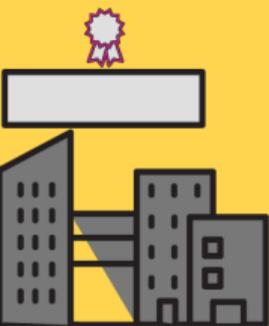

Collect this to win → 

Start at the End!

 x2 SCORE 62831

Should we try to collect this?

Collect this to win →

Start at the End!

 x2 SCORE 62831

Should we try to collect this?

Starting at the End...

If we only have one decision left to make, and we know all of the information, it is easy!

Collect this to win →

Start at the End!

 x2 SCORE 62831

Should we try to collect this?

Starting at the End...

If we only have one decision left to make, and we know all of the information, it is easy!

Collect the award **IF** the amount of energy required is less than what we have.
Do not otherwise.

Collect this to win →

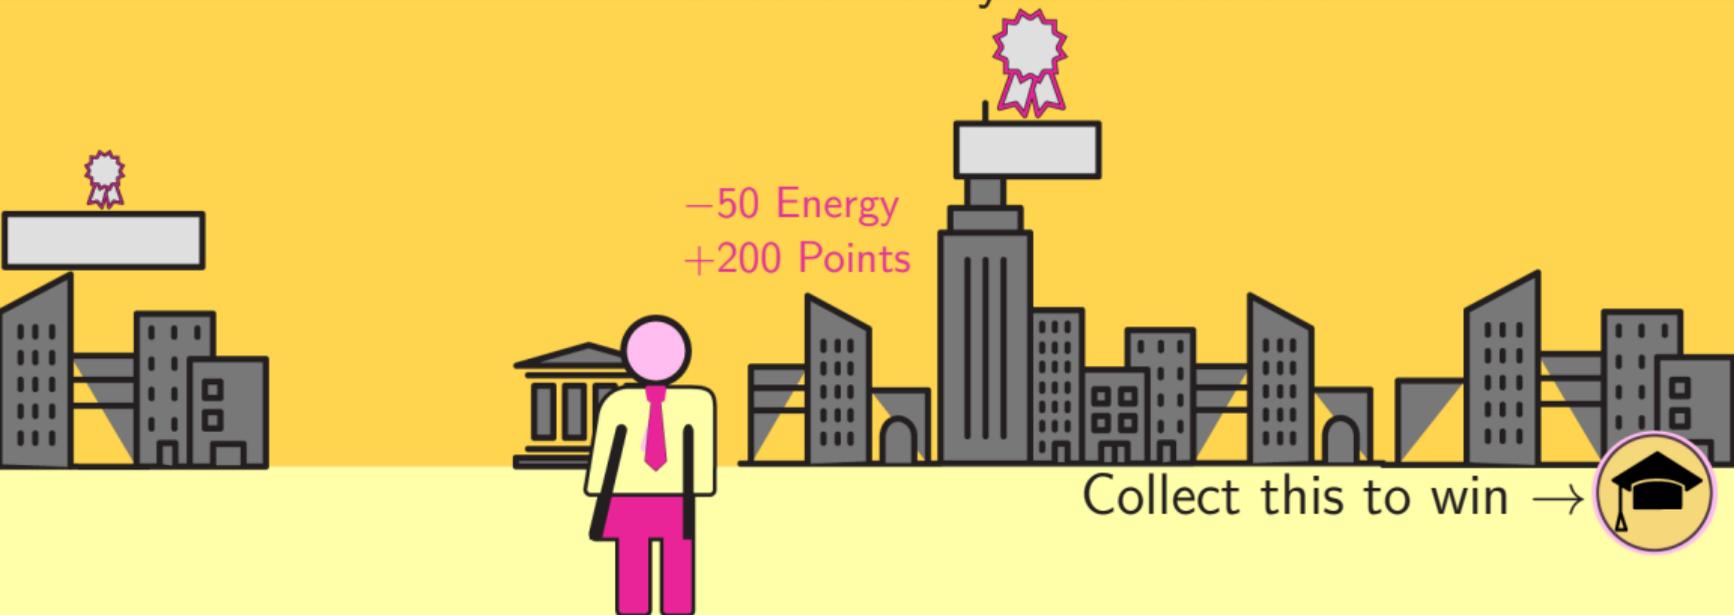

Start at the End!

 x2 SCORE 62831

Should we try to collect this?

-1000 Points

Start at the End!

 x2 SCORE 62831

Then, we step back...

We can then treat the second last decision as the end stage... and then the third last...

... this is the end now...

 x2 SCORE 62831

-10 Energy
+50 Points

+30 Energy

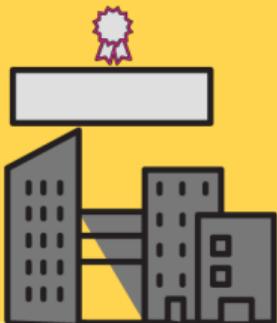

... this is the end now...

 x2 SCORE 62831

-10 Energy Next Stage: +0 Points
+50 Points

+30 Energy Next Stage: +200 Points

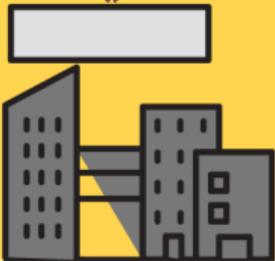

... this is the end now...

 x2 SCORE 62831

-10 Energy
+50 Points

-20 Energy
+200 Points

... *this* is the end now...

SCORE 62401

What about randomness?

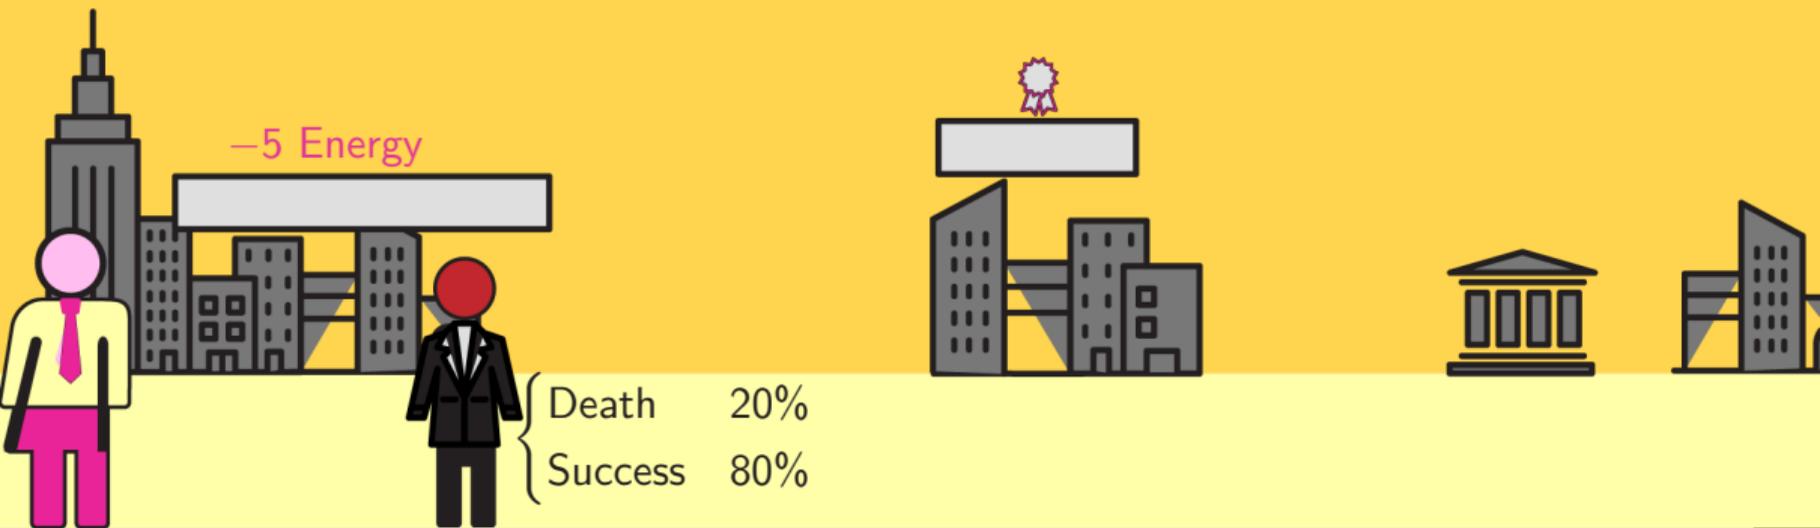

What happens when the exact outcomes are not certain?

... *this* is the end now...

 x2 SCORE 62401

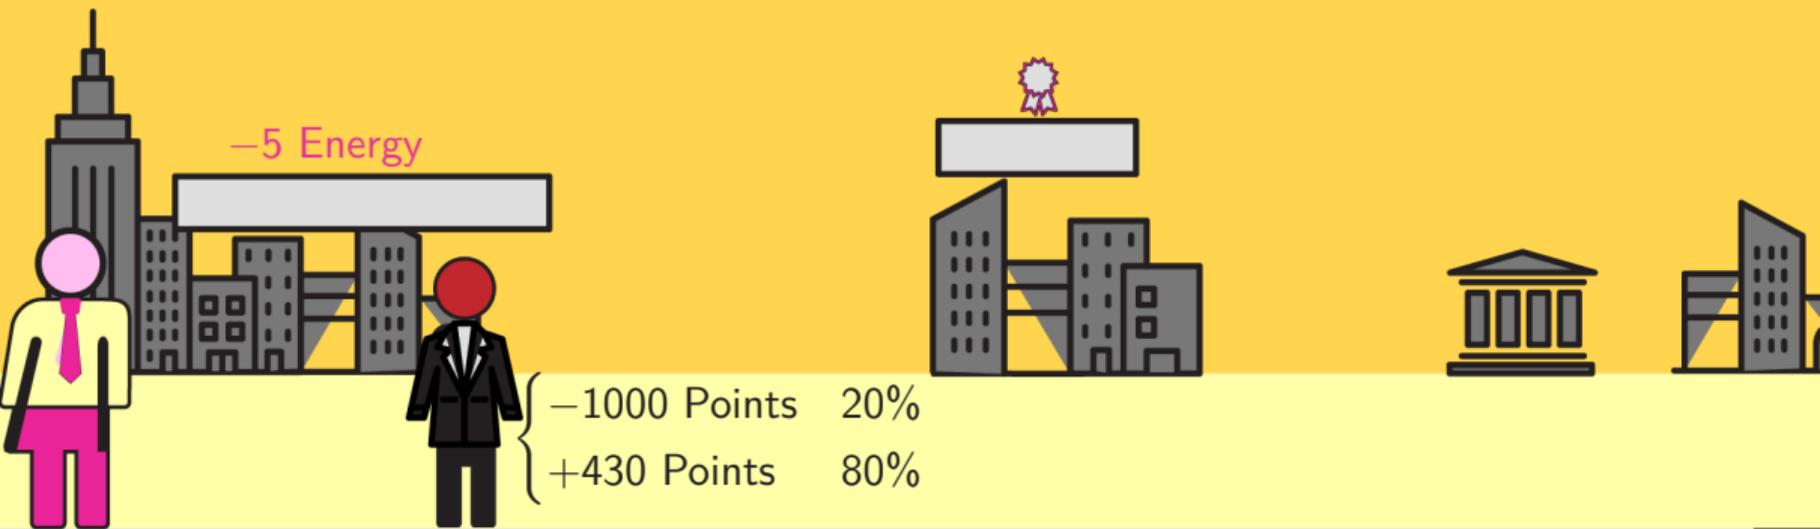

Death 20%
Success 80%

... *this* is the end now...

 x2 SCORE 62401

... *this* is the end now...

 x2 SCORE 62401

... *this* is the end now...

 x2 SCORE 62401

What about randomness?

What happens when the exact outcomes are not certain?

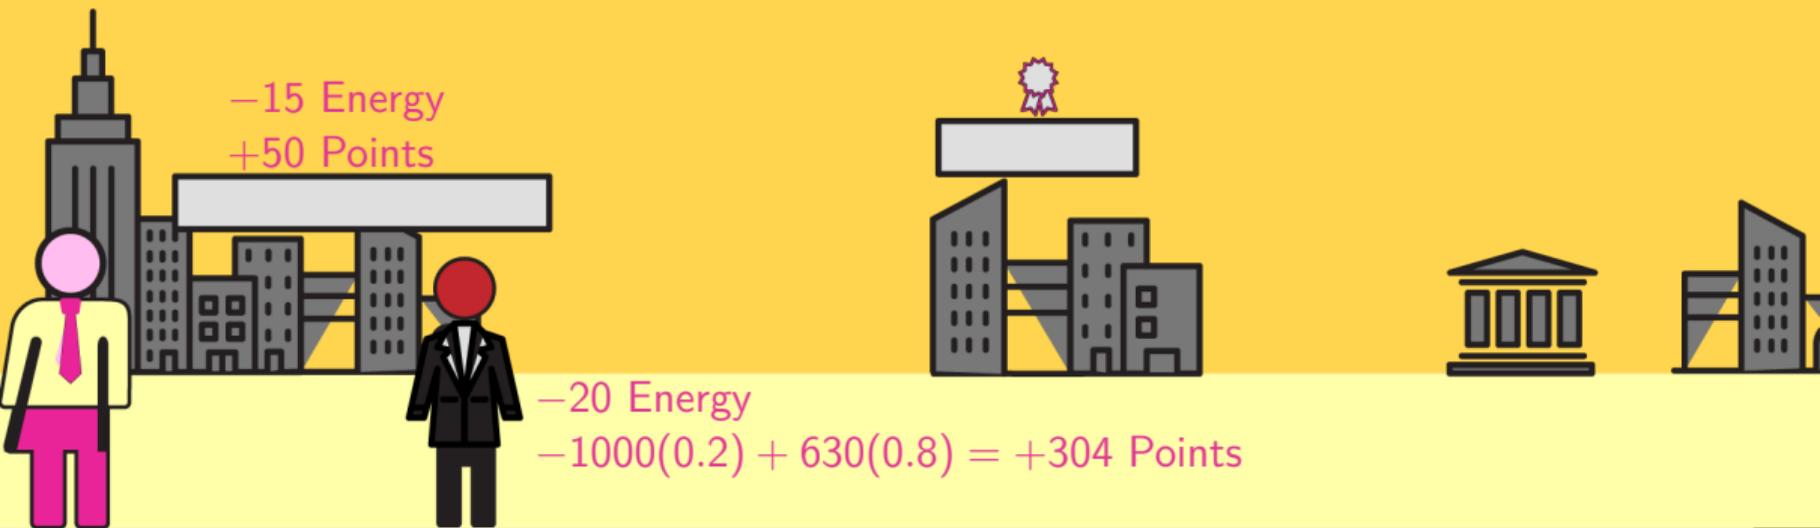

Solution: Use expected value!

... *this* is the end now...

 x2 SCORE 62401

-15 Energy
+50 Points

-20 Energy
 $-1000(0.2) + 630(0.8) = +304$ Points

I Swept Some Stuff Under the Rug

But what about...

- ▶ determining the point values?

I Swept Some Stuff Under the Rug

But what about...

- ▶ determining the point values?
- ▶ continuous decision space?

I Swept Some Stuff Under the Rug

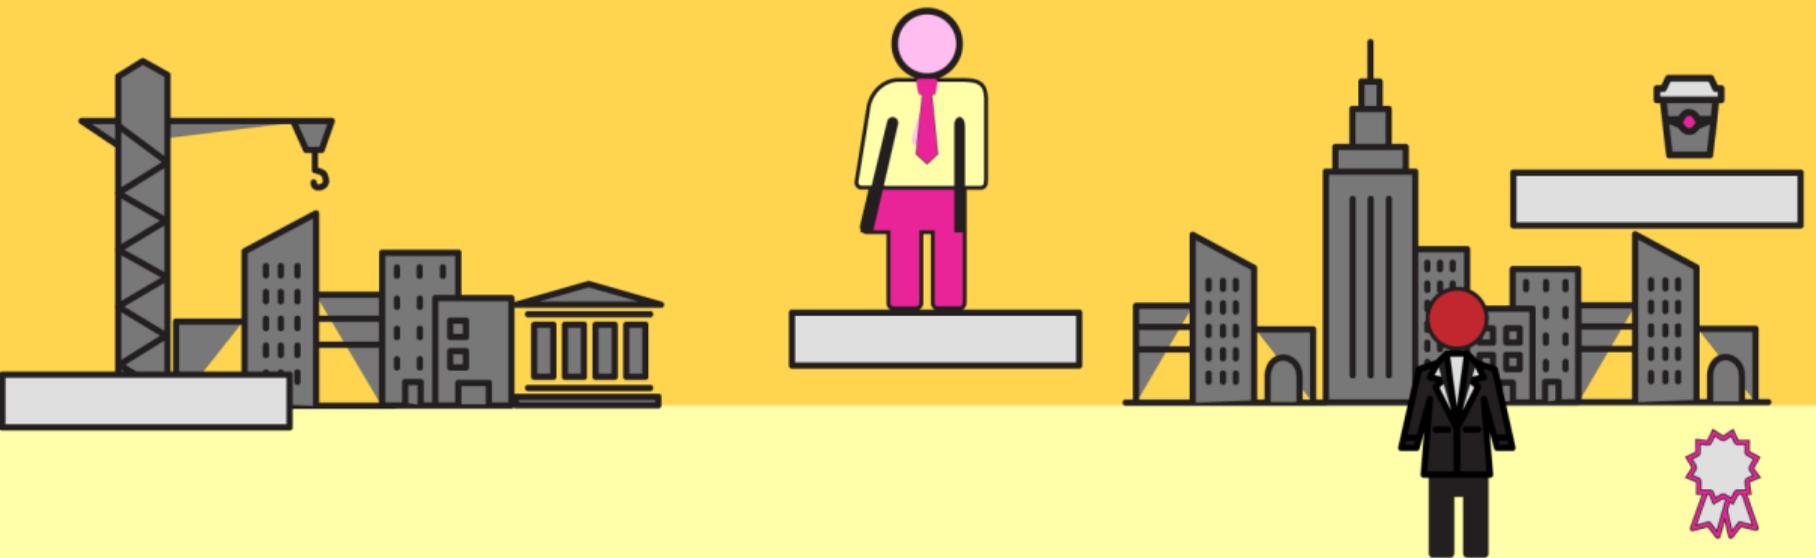

But what about...

- ▶ determining the point values?
- ▶ continuous decision space?
- ▶ if you're not good?

That was cool (... in the '80s)

 x5 SCORE 31415

That was cool (... in the '80s)

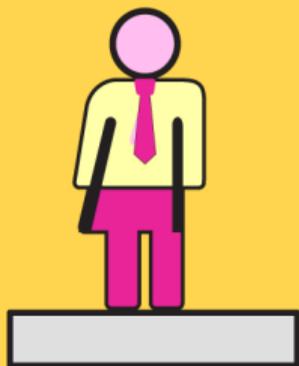

Energy Bar (no value?) ↑

Health Bar (no value?!) ↑

x5 SCORE 31415

How much energy?! ↓

How many points?! ↑

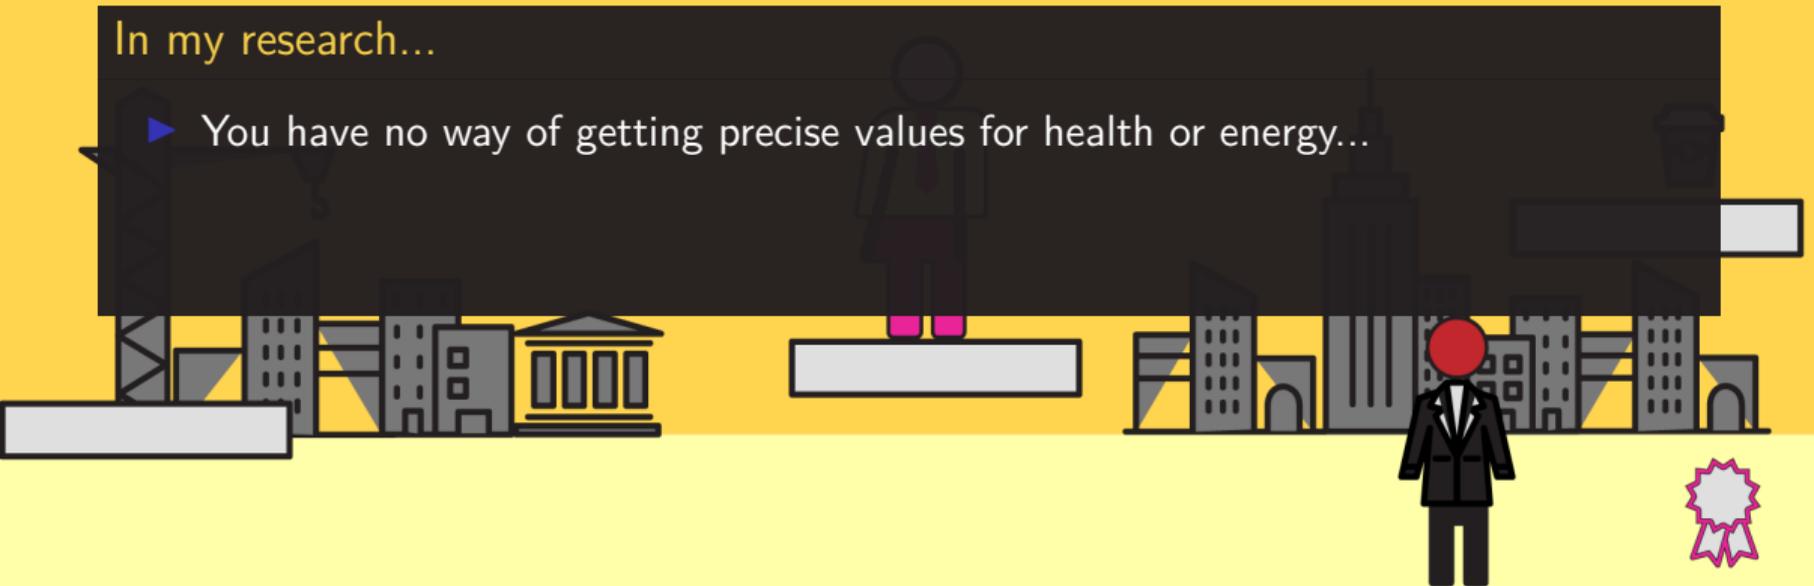

That was cool (... in the '80s)

 x5 SCORE 31415

In my research...

- ▶ You have no way of getting precise values for health or energy...

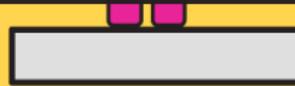

That was cool (... in the '80s)

 x5 SCORE 31415

In my research...

- ▶ You have no way of getting precise values for health or energy...
- ▶ You cannot know exactly how many points an action will give...

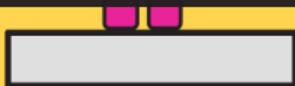

That was cool (... in the '80s)

 x5 SCORE 31415

In my research...

- ▶ You have no way of getting precise values for health or energy...
- ▶ You cannot know exactly how many points an action will give...
- ▶ You've spilled pop on your keyboard, so sometimes the keys just don't work...

We call this **Measurement Error**

Can we even do anything about it?

Can we even do anything about it?
... Maybe?

Can we even do anything about it?

... ~~Maybe?~~ sometimes!!

Can we even do anything about it?

... ~~Maybe?~~ sometimes!!

But we need extra data ...

Can we even do anything about it?

... ~~Maybe?~~ sometimes!!

But we need extra data ...

... and assumptions.
